

Editorial Index 1969

Index to editorial articles appearing in Iron Age Metalworking International during the year 1969

Automation

- Adaptive Turning Makes Debut, Oct p 30
- Automated Electronic System Controls Foundry Operations, Feb p 32
- Automated Forging Press, Jan p 39
- Computer Eases Startup, July p 27
- Computerized Sheet Production, Feb p 46
- Computers Assist at Drawing Board, Nov p 48
- Foundry Process Computer, Sept p 31
- Hardness Tests Automated, Feb p 45
- Machined Components Checked With On-Line Computer, July p 26
- Matching Materials and Process Reduces Production Costs, July p 22
- Monitoring System Links Mill Floor, Production Control, Sept p 26
- Program Sequence Control, Nov p 39
- Punched Cards Control Mill, Feb p 43
- Rotary Transfer Arrangement Speeds Forging Operation, Feb p 44
- Tape Controls Tube Plating, Jan p 37
- Tracer Controls Compute With NC, Dec p 32

Casting

- Casting Alloy Checks Friction, Sept p 30
- Casting Process Makes Coins, Nov p 37
- Diceasting Battles Competition With Advanced Techniques, Aug p 23
- High-Performance Pump Allows Hot-Chamber Die Casting, Apr p 42

Cold Extrusion

- Multi-Stage Cold Extrusion Is Achieved Without Annealing, June p 44
- Research and Development Produces Better Extrusions, Nov p 44

Cold Forming

- Cold Forming Flexibility Extends Its Potential, Aug p 28
- Ford Plans Greater Use of Rough Roll-Formed Gears, Feb p 40
- NC Directory, Dec p 41

Continuous Casting

- Cast Composites Cut Cost, Nov p 43

Drawing

- Metal Stampers Discuss Ways to Better Products, Reduce Costs, July p 17

Fabricating

- Automatic Assembly System Includes Machining, Inspection, Aug p 36
- Electromagnetic Forming, Mar p 37
- Plated Plastics Get New Tasks, Feb p 30
- Stainless Extrusions Save Machining Time, Oct p 37
- The Emergence of Epoxies, Sept p 34
- The New Generation of Aircraft, Oct p 27
- Versatile Beam Welding Mills Produce Structural Shapes, Oct p 34

Fasteners

- How Tight is Tight?, May p 23
- Low-Cost Fastener System Improves Fatigue Life, Nov p 46
- Rivet Design Saves Time, Feb p 37

Flame Cutting

- NC Directory, Dec p 41

Forging

- Automated Forging Press, Jan p 39
- Despite Growing Competition, Forging Industry Fights Back, Mar p 28
- Finished Forgings by Automation, Aug p 27
- Numerically Controlled Machine Forges Stainless Steel Bars, Jan p 36
- Rotary Transfer Arrangement Speeds Forging Operations, Feb p 44

Foundry

- Automated Electronic System Controls Foundry Operations, Feb p 32
- Foundry Process Computer, Sept p 31
- New Process Permits Casting Centrifugally, Continuously, Feb p 36

Heat Treating

- Heat Treating Aluminium, Mar p 30
- Matching Materials and Process Reduces Production Costs, July p 22
- New Melting, Treating Methods Advance Steel Technology, Jan p 23
- Surface Hardening Gets Better, Dec P 34

Hot Extrusion

- Research and Development Produces Better Extrusions, Nov p 44

Hydraulics

- Hydraulic Fluid Costs Trimmed, Oct p 38

Inspection

- High-Output Inspection, Apr p 43
- Interchangeable Bearing Parts Result of Complete Uniformity, Jan p 34
- Improved Methods Expedite Slab and Strip Marking, Apr p 36
- Machined Components Checked With On-Line Computer, July p 26
- Nucleonic Thickness Gauge, Oct p 33

Joining

- Adhesive Eases Assembly, Apr p 35
- Explosive Bonding Technology Finds Uses in Metalworking, Jan p 30
- The Emergence of Epoxies, Sept p 34
- Two Bonding Systems Joined, Apr p 31
- Vacuum Brazing Easily Joins Hard-to-Braze Materials, July p 20
- Vapours for Sound Joints, Feb p 33

Lubrication

- Coolant Chart Helps Select Fluids For Internal Grinding, Aug p 34

Machine Tools

- A Shop Man's Approach To Machine Tool Replacement, Mar p 15
- Welds Cut Lathe Building Costs, Nov p 50

Machining

- Abrasives Cut Thick Plates, Jan p 33
- Adaptive Turning Makes Debut, Oct p 30
- Automated Transfer Units Speed Wheel Machining, Nov p 40

- Automatic Assembly System Includes Machining, Inspection, Aug p 36
- Combined Milling, Routing, Mar p 40

- Coolant Chart Helps Select Fluids For Internal Grinding, Aug p 34

- Copying Lathe Saves 70%, May p 29

- Cross Slides Add Flexibility, May p 40

- Efficient NC Machining Centre Has Auxiliary Multi-Spindle Unit, July p 28

- Electrical Machining Finds Production Jobs, Apr p 27

- European Machine Tool Exhibition Preview, June p 53

- Exapt Progress Report: More Applications, Automation, June p 35

- Fine Holes Are Drilled in Steps, Feb p 38

- Four-Station Transfer Line Replaces 30 Machine Tools, Jan p 40

- Improved Carbide Tool Life, July p 30

- Laser In Use for Machining, Feb p 39

- Linked Lathe Line Has High Flexibility, Automation, Aug p 38

- Machining Centre That Turns Adds Versatility to Machining, Nov p 42

- Machining the Wankel Engine, Apr p 40

- New Milling Cutter Improves Finish And Production Rate, Jan p 38

- NC Directory, Dec p 41

- NC Sawing and Drilling Finds Uses in Structural Steel Works, Sept p 32

- NC Machine Workshop Has Jig Borers, Machining Centres, Sept p 28

- NC Grinder Begins Production, Oct p 36

- NC Speeds Order Processing, Feb p 42

- Open-Loop NC Systems, June p 31

- Planning and Organizing for NC, Oct p 15

- Planning and Organizing for NC, Dec p 17

- Planning Replaces Milling of Titanium Extrusions, May p 26

- Planning and Organizing for NC, Oct p 15

- Planning for Numerical Control, June p 22

- Program Sequence Control, Nov p 39

- Remote & In-House Computers Control 13 NC Machines, July p 24

- Time Sharing Cuts NC Costs, Apr p 38

- Tracer Controls Compete With NC, Dec p 32

- Versatile Machining Centre Has Dual Tool Changing System, Mar p 38

- When Computers Run Machines, June p 33

- Versatile NC Machining Center, May p 38

- When Computers Run Machines, June p 33

Management

- A Shop Man's Approach to Machine Tool Replacement, Mar p 15
- Better Industrial Training Needed, Apr p 19
- Case Studies in Cost Reduction, Feb p 19
- How To Set Up and Use A Profit Improvement Plan, Jan p 15
- Management in the U.K.: A Review, Aug p 12

- Managing Design Engineering: A Science or an Art?, Nov p 25

- NC Speeds Order Processing, Feb p 42

- Planning and Organizing for NC, Oct p 15

- Planning for Numerical Control, June p 22

- Small Plant Uses Time Wisely, May p 13

- Steel Industry Integration: Has It Gone Too Far?, July p 8

- Steel Plant Planning, Management, Sept p 11

Materials

- Aluminium Alloy Bearings, June p 45
- Cast Composites Cut Cost, Nov p 43
- Changing Trends in Use of Automotive Materials, June p 42
- Machining Tool Builders Enter Plastics Machinery Field, Feb p 27
- Metal Remembers Its Shape, Nov p 49
- Plated Plastics Get New Tasks, Feb p 30
- Raw Material Transportation: Developments Bring Economies, Dec p 36
- Stainless Extrusions Save Machining Time, Oct p 37
- The Multi-Shapes of Single-Crystal Filaments, Nov p 35
- The New Generation of Aircraft, Oct p 27
- Titanium Explores Its Problems, Apr p 32

Materials Handling

- Automated Transfer Units Speed Wheel Machining, Nov p 40
- Materials Handling Technology Comes Into Focus, Mar p 23

Metal Finishing

- Flame-Plating Process Provides Wear Resistance, Apr p 34
- Plated Plastics Get New Tasks, Feb p 30
- Platers Have Several Options in Pollution Control, Feb p 34
- Reliable Plating Process, June p 41
- Sputter Coating Gains Favour, June p 38
- Tape Controls Tube Plating, Jan p 37
- The Emergence of Epoxies, Sept p 34
- Vibratory Finishing, Aug p 29

Metallurgy

- A Method To Identify Steels, May p 35
- Casting Alloy Checks Friction, Sept p 30
- Improved Carbide Tool Life, July p 30
- New Nickel-Based Alloy Solves Weld-Zone Corrosion Problems, Aug p 30
- Powder Metallurgy Produces New Tool Steels, May p 28

Nonferrous

- Copper: World Political Metal, May p 32

Numerical Control

- Computer Numerical Control Reshapes Small Shop Goals, May p 36
- Computer System Inspects And Adjusts Carburetors, Mar p 36

- Exapt Progress Report: More Applications, Automation, June p 35

- Five-Axis NC Welder, Mar p 31

- Machining Centre That Turns Adds Versatility to Machining, Nov p 42

- NC Adds New Dimension to Sheet Metalworking, Dec p 29

- NC Grinder Begins Production, Oct p 36

- NC Machining Workshop Has Jig Borers, Machining Centres, Sept p 28

- NC Sawing and Drilling Finds Uses in Structural Steel Work, Sept p 32

- NC Speeds Order Processing, Feb p 42

- Numerically Controlled Machine Forges Stainless Steel Bars, Jan p 36

- Open-Loop NC Systems, June p 31

- Planning and Organizing for NC, Oct p 15

- Planning and Organizing for NC, Dec p 17

- Planning for Numerical Control, June p 22

- Remote & In-House Computers Control 13 NC Machines, July p 24

- Tape Controls Tube Plating, Jan p 37

- Time Sharing Cuts NC Costs, Apr p 38

- Versatile Machining Centre Has Dual Tool Changing System, Mar p 38

- Versatile NC Machining Center, May p 38

- When Computers Run Machines, June p 33

Plastics

- Machining Tool Builders Enter Plastics Machinery Field, Feb p 27
- Plated Plastics Get New Tasks, Feb p 30
- Ultrasonic Plastics Welding, Aug p 37

Pollution Control

- Platers Have Several Options In Pollution Control, Feb p 34
- New Design Extends Bearing Life, May p 34
- Powder Metallurgy Produces New Tool Steels, May p 28

Power Transmission

- Interchangeable Bearing Parts Result of Complete Uniformity, Jan p 34

Presswork

- Computer Numerical Control Reshapes Small Shop Goals, May p 36
- Despite Growing Competition, Forging Industry Fights Back, Mar p 28
- Die Insert Boosts Capacity, Mar p 35
- Fine Blanking Is Improving Productivity, Product Quality, Nov p 38
- Isostatic Press Automates, May p 31
- Metal Stampers Discuss Ways to Better Products, Reduce Costs, July p 17
- Novel Press Installation, Nov p 47
- NC Adds New Dimension to Sheet Metalworking, Dec p 29
- NC Directory, Dec p 41
- Reducing Hydraulic Shock, Oct p 39

Rolling

- Novel Slitting Line Adjusts For Guage Differences, Mar p 34
- Ring Rolling Mills Feature High Rolled-Section Consistency, May p 30

Stamping

- Metal Stampers Discuss Ways to Better Products, Reduce Costs, July p 17
- NC Adds New Dimension to Sheet Metalworking, Dec p 29

Steelmaking

- Abrasive Grinding for Slabs, Sept p 27
- A Methods To Identify Steels, May p 35
- Better LD Refractory Practices, June p 39
- Coal Tar Pitch Conversion, May p 27
- Coating Saves Electrodes, Feb p 41
- Computer Eases Startup, July p 27
- Computerized Sheet Production, Feb p 46
- Gas Jets Heat Billets Quickly, Jan p 29
- Copying Lathe Saves 70%, May p 29
- Improved Methods Expedite Slab and Strip Marking, Apr p 36
- LD-Kaldo Process Speeds High-Phosphorous Steelmaking, Mar p 32
- Monitoring System Links Mill Floor, Production Control, Sept p 26
- New Melting, Treating Methods Advance Steel Technology, Jan p 23
- New South African Complex Produces Vanadium and Steel, Aug p 32
- Novel Direct Reduction Process Begins Commercial Operations, June p 37
- Punched Cards Control Mill, Feb p 43
- Raw Material Transportation: Developments Bring Economies, Dec p 36
- Ring Rolling Mills Feature High Rolled-Section Consistency, May p 30
- Steel Industry Integration: Has it Gone Too Far?, July p 8
- Steel Strip From Powder Metal, Oct p 32
- Supervisory Computers in Steel, July p 32

Testing

- Computer System Inspects And Adjusts Carburetors, Mar p 36
- Hardness Tests Automated, Feb p 45
- Material Flaws Testing, July p 25
- Nucleonic Thickness Gauge, Oct p 33
- Photoelastic Analysis, Aug p 31

Welding

- Cleaning: First Stage in Welding, Sept p 24
- Explosive Bonding Technology Finds Uses in Metalworking, Jan p 30
- Five-Axis NC Welder, Mar p 31
- How to Control Weld Distortion, Sept p 25
- Low-Cost Friction Welding, Apr p 39
- Remote & In-House Computers Control 13 NC Machines, July p 24
- Spotlight on Spot Welding: Improvements Enhance Process, Sept p 19
- "Tailored" Welding Electrodes Are Designed to Fill a Need, June p 40
- Tests Predict Weldability, Sept p 23
- Titanium Explores Its Problems, Apr p 32
- Tungsten Scrap Is Wasted, June p 43
- Two Bonding Systems Joined, Apr p 31
- Ultrasonic Plastic Welding, Aug p 37
- Versatile Beam Welding Mills Produce Structural Shapes, Oct p 34
- Welding Box Columns, Jan p 35
- Welds Cut Lathe Building Costs, Nov p 50
